# Sustainability Commitment

## COHESIVE APPROACH ACROSS THE BUSINESS

To reduce our impact on the environment, create vibrant spaces for tenants, engage more with stakeholders and provide transparent and effective governance...

- Targeting >50% of the portfolio to be green by 2031
- Targeting carbon emission reductions of 17.5% by 2031
- Initial XRB climate disclosures completed in FY24
- Health & safety focus (zero harm)
- Ongoing engagement with our community
- Committed to high standards of corporate behaviour

Portfolio by Green Asset Type

### Sustainability Reporting

- An important responsibility is to identify and assess the risks presented by climate change, just as we manage other risks facing our business.

### Asset Performance Ratings

- Third party verification to validate building performance through a mixture of energy ratings (NABERSNZ) and internationally recognised systems (Green Star) for sustainable design, operational excellence, construction and community impact.

### ESG Ratings

- ESG ratings provide stakeholders with a standardised way to evaluate our sustainability practices and ethical conduct against a global pool of companies. We are currently AA rated by MSCI.

# Sustainability reporting becoming more complicated

## SUSTAINABILITY REPORTING

- The Global Reporting Initiative (GRI) is an international independent standards organisation that provides a widely adopted framework for sustainability reporting, used by over 10,000 organisations in more than 100 countries.
- In 2022, the External Reporting Board (XRB) issued the Aotearoa New Zealand Climate Standards, a mandatory framework for Climate-Reporting Entities to assess and report on climate related risks and opportunities annually.

## ASSET PERFORMANCE

- NABERSNZ is a rating tool developed by National Australian Built Environment Rating System and this is licensed to EECA and administrated by NZGBC. This is an energy efficiency rating that standardises buildings energy use to allow comparisons to be made.
- The Green Star rating tool is New Zealand's largest sustainability rating system for buildings. The rating system awards points across various performance and environmental elements of a buildings design or completed construction to assess its sustainability and environmental impact.

## ESG REPORTING

- The MSCI ESG rating framework is designed to measure a company's resilience to long-term, industry material environmental, social and governance (ESG) risks.
- The CDP reporting framework takes the information supplied by corporates and scores them based on their journey through disclosure and towards environmental leadership and climate change.

# Financial Performance

## SOLID TOP LINE GROWTH

- The net property income increase for the period was principally driven by solid like-for-like rental growth and development income from completed projects such as 8-14 Willis Street and 105 Carlton Gore Road
- Net interest expense was higher driven by higher floating interest rates, higher average debt and lower capitalised interest
- The full year revaluation decline reflected a 5.4% reduction on book value

**\$116.5m**

NPI for the period, up 3.3%

# Distributable Income

## SOUND RESULT

- Net distributable income for the year was \$55.8m compared to \$64.2m in the prior comparable period
- The variance from last year was driven primarily due to higher interest costs and higher taxation
- The prior comparable period also benefited from the receipt of a \$3.0m settlement for the failed sale of the Albany Lifestyle Centre

# Investment Property Waterfall

Revaluation impacts portfolio value decline

# Balance Sheet Management

## GEARING AT THE MID-RANGE OF TARGET BAND

- The balance sheet is in good shape
- Argosy has sufficient facility headroom to complete existing developments and act on any near-term opportunities
- Green projects will continue to be a key focus, particularly 224 Nielson Street
- At 31 March, \$23.0m in assets were regarded as non Core
- Four non Core assets divested over the period totalling \$93.1m

# 36.5%

115

Rent reviews over the period, annualised rental growth of 3.5%

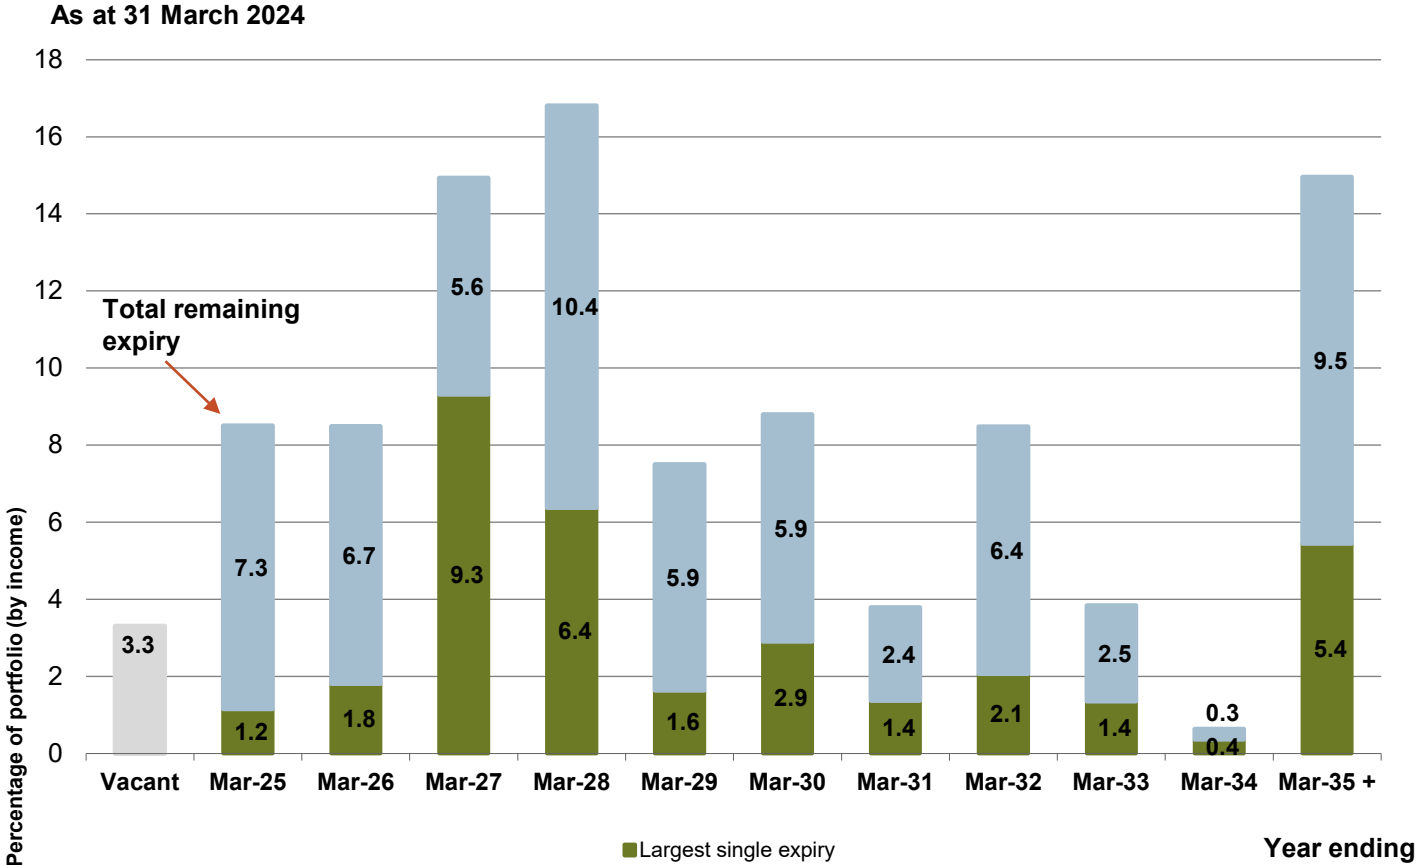

# Lease Expiry & Rent Review Profile

## MEDIUM TERM LEASE EXPIRY PROFILE IS WELL MANAGED

- Largest single expiry remains MBIE in 2027
- Average annual expiry over the next three years is ~11%

3.5%

Annualised rent review growth over the year to 31 March

# Market Insights

## INDUSTRIAL

- Softer period of both supply and demand currently as projected for 2024 as both occupiers and developers struggle
- Limited land supply in Auckland and Wellington continues pressure on land values, with prime sites holding their value
- Rent continues to show some growth in well specified and well located assets
- Vacancy remains very low, with limited speculative supply and with little expansion capacity
- Modest reduction in construction costs reduces rental growth pressure

## OFFICE

- Flexible working environments continue but working from home and full-time remote work are declining
- Changes in the way space is used, focusing on the environment, now a staff attraction matter
- Continued focus from tenants on sustainability/green
- Increase in desire for flexibility in lease terms from tenants
- Wellington vacancy levels have increased and are expected to increase further, particularly in secondary locations and for poorer quality stock (seismic issues)

## LARGE FORMAT RETAIL

- Retail turnover rates have declined significantly on a per capita basis
- Discretionary lines showing a significant drop in sales
- Online proportion of total sales continues to reduce
- Large Format Retail continues to receive solid demand in prime locations
- "Moving of the deck chairs" as market share changes
- Retailers consolidating to a fewer number of locations
- Increased costs of operation are giving affordability issues

# Our sustainability journey has been long

Argosy

## Focus and outlook

# OUTLOOK

## STAYING FOCUSED ON ACHIEVING STRONG OPERATIONAL RESULTS AND EXECUTING ON STRATEGIC GOALS

- New Zealand's domestic economy continues to experience challenging headwinds from stubborn inflation and restrictive interest rates.
- The diversified portfolio exposure continues to provide a degree of resilience.
- Argosy is well placed, with a solid capital position to continue to transform towards a green & environmentally sustainable business.
- Our key focus areas for 2025 are to:
  1. deliver strong operational results by addressing key expiries, leasing up remaining vacancies and achieving strong rental growth;
  2. deliver on key strategic objectives including green developments and other value add opportunities;
  3. achieve Green Star & NABERSNZ certifications; and
  4. divest low growth assets and reinvest proceeds into green developments.
